

Business Case

IntelliSource by Gijima

IntelliSource
by Gijima

An AI-driven, end-to-end sourcing & contracting platform that turns plain-language needs into RFX events, automates supplier discovery, evaluates bids, orchestrates stakeholders in Teams, and drives to contract award — with full auditability.

Executive Summary

IntelliSource is Gijima's proposed AI-driven procurement orchestration solution, built to transform how organizations manage sourcing, vendor discovery, RFx processes, evaluation, compliance, and supplier collaboration. This business case consolidates market opportunity, competitor landscape, feature set, investment model, and revenue forecasts, with figures in both South African Rand (ZAR) and US Dollars (USD), enabling Gijima executives to make an informed strategic decision.

Market Opportunity

The global procurement SaaS market is valued at approximately \$8–10 billion annually, with CAGR exceeding 10%. Africa represents an untapped market with public enterprises, banks, telcos, and mining firms facing procurement inefficiencies and regulatory pressure. Current players lack deep Microsoft integration and regional compliance features like POPIA and King IV.

Problem Statement

Organizations still rely on manual procurement processes, siloed governance, and fragmented systems. This results in extended sourcing cycles, higher costs, limited supplier coverage, and compliance risks. Cloud breaches from misconfigurations highlight the urgent need for secure, automated, and governed procurement platforms.

Proposed Solution: IntelliSource

IntelliSource is an autonomous procurement orchestrator that integrates with Microsoft 365 and SAP/Dynamics, embedding AI in every step of the procurement lifecycle. It simplifies requirement intake, generates RFQs, discovers vendors, automates evaluation, orchestrates collaboration via Teams, and ensures compliance with regulatory frameworks. By doing so, it delivers measurable improvements in cycle time, supplier diversity, and governance maturity.

Business Rationale for Investment

Why this product makes sense now:

- **Market trend:** Global Source-to-Pay (S2P) platforms (SAP Ariba, Coupa, GEP, Ivalua, Jaggaer) are big, but **fragmented and complex**. Customers complain about usability, cost, and supplier fees.
 - **AI tailwind:** Most suites are only **experimenting with GenAI** (intake, contract AI). None yet deliver *end-to-end orchestration* (requirement → RFX → evaluation → Teams workflow → contracting).
 - **Microsoft-first ecosystems:** Many enterprises are standardized on Microsoft 365 and Teams. Your solution could be **deeply embedded** in M365, making adoption faster and cheaper vs. heavy SAP/Coupa rollouts.
 - **Customer pain:** Procurement still wastes **months on manual RFQs/RFPs**, incomplete supplier coverage, and clunky committee approvals. If you cut 30–40% cycle time, ROI is clear.
-

2. Critical Requirements to Build & Launch

Product:

- Core modules (Requirement intake, Supplier discovery, RFX automation, Evaluation AI, Contract workflow).
- Microsoft 365 integration (Teams, Outlook, Entra ID).
- ERP connectors (Dynamics, SAP, Oracle, Sage).
- Security/compliance (ISO 27001, SOC2, GDPR, POPIA).
- Multi-tenant SaaS OR in-tenant deployment option for regulated industries.

Business Model:

- SaaS subscription (tiers by # of sourcing events/users).
- Optional managed services layer (Gijima or partner helps run sourcing events).

- Partner integrations (TealBook for supplier data, DocuSign for contracts).

Go-to-Market:

- Positioning: “Autonomous Procurement Orchestrator” → simpler, faster, cheaper than Coupa/Ariba, **Microsoft-native**.
 - ICP: Mid-to-large enterprises (\$500M–\$5B turnover) that find Coupa/Ariba overkill or too costly.
 - Channels: Microsoft Marketplace (co-sell eligible), Partner eco (Dynamics integrators, M365 resellers).
-

3. Investment Logic

It makes sense to invest if:

- You can **differentiate clearly** (AI-driven, Microsoft-native orchestration).
 - You have access to **target customers** (existing Gijima client base, CIO/CPO networks).
 - You can build a **minimum viable product (MVP)** in 9–12 months using modular integrations (don’t build everything from scratch).
 - You validate willingness-to-pay (e.g., \$8k–\$15k/month SaaS for mid-market; \$250k+ annual enterprise subscription).
-

4. Build vs. Partner Decision

- **Build:** Higher cost/risk, but creates **IP and defensible product** that can scale, attract investors, and position Gijima as an innovator in AI procurement.
- **Partner/Resell (SAP Ariba, Coupa, etc.):** Lower risk, but you’ll always be “one of many” resellers, with limited differentiation and margin.

- **Hybrid:** Build your AI orchestration layer (intake → RFx automation → Teams workflows) and integrate with existing backbones (SAP, Coupa, Ivalua) where clients already have them. That way, your product is a **value-added accelerator** instead of a direct replacement.
-

✅ **Recommendation:**

It makes business sense to invest if you frame this as a **Microsoft-native procurement orchestrator** rather than just “another S2P platform.” The competitive white space is clear: executives want **speed, simplicity, AI orchestration, and Teams integration.**

3-Stage Roadmap

Stage 1: MVP (0–12 months)

🎯 **Goal:** Launch fast, validate with early adopters, prove ROI.

💰 **Investment:** Lean team (AI/ML engineers, procurement SMEs, Microsoft integration devs).

Core Features to Build First:

1. Requirement intake → spec generation (GenAI turns plain-language requests into structured RFQ specs).
2. RFQ automation: Create and dispatch RFQs directly from spec, with deadlines and automated reminders.
3. Microsoft 365 integration:
 - Teams (auto-schedule stakeholder review meetings).

- Outlook (email dispatch to suppliers).
- Entra ID (SSO + role-based approvals).

4. Basic evaluation scoring: Weighted scoring matrix + AI summary report.

5. Audit trail: Store all RFQ activity + approvals for compliance.

Delivery Model:

- SaaS multi-tenant + in-tenant option for regulated customers.
- Deploy via Microsoft Marketplace (transactable).

Target Customer:

- Mid-market enterprises (\$500M–\$2B revenue) with Microsoft 365 but without advanced S2P suites.
-

Stage 2: Scale (12–24 months)

🎯 Goal: Broaden coverage, win enterprise deals, compete with Ariba/Coupa.

💰 Investment: Expand dev, add strategic partners (supplier data, contract mgmt).

New Features:

1. Supplier discovery beyond approved vendors (web scan + optional integration with TealBook, Dun & Bradstreet, ESG/diversity databases).
2. Stakeholder collaboration:
 - Committee e-voting in Teams.
 - AI-driven executive summaries (why certain bids scored higher).
3. Multi-round sourcing: BAFO workflows, scenario analysis.
4. ERP integrations: SAP, Oracle, Dynamics 365, Sage.

5. Regulatory compliance mapping: POPIA, GDPR, ISO frameworks auto-applied to evaluation.

Delivery Model:

- Introduce tiered pricing (by # sourcing events/users).
- Bundle optional Managed Procurement Service for customers who want Gijima or partners to run events on their behalf.

Target Customer:

- Large enterprises (\$2B–\$10B), often running SAP/Oracle back-ends, but want faster, AI-driven sourcing on top.

Stage 3: Advanced (24–36 months)

🎯 Goal: Full “Autonomous Procurement Orchestrator” with Source-to-Contract coverage.

💰 Investment: Advanced AI, deep CLM integration, ecosystem partnerships.

Advanced Features:

- 1. Tender evaluation AI: Completeness checks (missing docs, certs, compliance).**
- 2. Shortlisting orchestration: Automated scheduling of vendor presentations in Teams.**
- 3. Contracting workflows:**
 - **Auto-draft contracts from RFQ specs.**
 - **Clause libraries + AI redline suggestions.**
 - **eSignature (DocuSign/Adobe).**
- 4. Continuous improvement: AI learns from outcomes (supplier performance vs. promises).**
- 5. Spend analytics & forecasting: AI models to predict supplier risk, pricing trends, and contract leakage.**

Delivery Model:

- Enterprise subscriptions + outcome-based pricing (savings achieved, cycle-time reduced).
- Marketplace add-ons (e.g., AI Supplier Risk Pack).

Target Customer:

- Global enterprises (\$10B+) needing end-to-end orchestration, regulatory reporting, multi-cloud deployment.
-

☒ **Key Business Story**

- Stage 1: Fast, practical ROI → cut sourcing cycle times by 30% using Microsoft + AI.
- Stage 2: Broaden → add supplier discovery, ERP integration, and regulatory coverage.
- Stage 3: Differentiate → full autonomous orchestration, contracts, and predictive analytics.

Key Features

Executive-Level Capability Matrix (50 Features)

Legend:  Native/Out-of-the-box |  Config/Add-on | — Not supported

A. Requirements & Intake

Feature	Ariba	Coupa	GEP	Ivalua	Jaggaer	IntelliSource
Natural-language intake (request to spec)				✓		
Template/spec generation from brief				✓		
Approval routing on intake	✓	✓	✓	✓	✓	
Budget/GL check at request	✓	✓	✓	✓	✓	
Category taxonomy auto-tagging						

****Takeaway:**** IntelliSource shows strongest coverage in A. Requirements & Intake, with many features native compared to competitors relying on add-ons.

B. Supplier Discovery & Master Data

Feature	Ariba	Coupa	GEP	Ivalua	Jaggaer	IntelliSource
Lookup approved suppliers	✓	✓	✓	✓	✓	
Discover new suppliers (web/DB)						

Supplier risk scoring	✓	✓	✓	✓	✓	✓
Diversity & ESG attributes	●	✓	●	✓	●	✓
Legal entity resolution	●	●	●	●	●	✓

****Takeaway:**** IntelliSource shows strongest coverage in B. Supplier Discovery & Master Data, with many features native compared to competitors relying on add-ons.

C. RFx Authoring & Automation

Feature	Ariba	Coupa	GEP	Ivalua	Jaggaer	IntelliSource
AI-draft RFQ/RFP/RFI from spec	●	●	●	●	●	✓
Event types: RFI/RFQ/RFP/auction	✓	✓	✓	✓	✓	✓
Deadlines, reminders, blackout/Q&A windows	✓	✓	✓	✓	✓	✓
Multi-round / BAFO orchestration	✓	✓	✓	✓	✓	✓
Commercial/technical envelope separation	✓	●	✓	✓	✓	✓

****Takeaway:**** IntelliSource shows strongest coverage in C. RFx Authoring & Automation, with many features native compared to competitors relying on add-ons.

D. Distribution & Communications

Feature	Ariba	Coupa	GEP	Ivalua	Jaggaer	IntelliSource
---------	-------	-------	-----	--------	---------	---------------

Bulk email dispatch to vendors	✓	✓	✓	✓	✓	✓
Secure bidder portal & NDA gating	✓	✓	✓	✓	✓	✓
Anonymous Q&A & addenda	✓	✓	✓	✓	✓	✓
Calendar-aware invites/time-zone handling	●	●	●	●	●	✓
Auto vendor de-duplication/contact validation	●	●	●	●	●	✓

****Takeaway:**** IntelliSource shows strongest coverage in D. Distribution & Communications, with many features native compared to competitors relying on add-ons.

E. Bid Evaluation & Decisioning

Feature	Ariba	Coupa	GEP	Ivalua	Jaggaer	IntelliSource
Weighted criteria scoring	✓	✓	✓	✓	✓	✓
Auto compliance checks (docs, forms, certs)	✓	✓	✓	✓	✓	✓
AI completeness review & gap flags	●	●	●	●	●	✓

Side-by-side & scenario analysis	✓	✓	✓	✓	✓	✓
AI executive summaries & outlier detection	●	●	●	●	●	✓

****Takeaway:**** IntelliSource shows strongest coverage in E. Bid Evaluation & Decisioning, with many features native compared to competitors relying on add-ons.

F. Collaboration & Governance

Feature	Ariba	Coupa	GEP	Ivalua	Jaggaer	IntelliSource
Tender committee workflows & e-voting	●	●	●	●	●	✓
Auto- schedule Teams meetings	●	●	●	●	●	✓
Full audit trail & evidentiary logs	✓	✓	✓	✓	✓	✓
Role-based access, SSO (Entra/Okta)	✓	✓	✓	✓	✓	✓
Approval tiers &	✓	✓	✓	✓	✓	✓

segregation
of duties

****Takeaway:**** IntelliSource shows strongest coverage in F. Collaboration & Governance, with many features native compared to competitors relying on add-ons.

G. Contracting & Legal

Feature	Ariba	Coupa	GEP	Ivalua	Jaggaer	IntelliSource
CLM repository & metadata	✓	✓	✓	✓	✓	✓
Clause library & playbooks	✓	✓	✓	✓	✓	✓
Redline compare & version control	✓	✓	✓	✓	✓	✓
E-signature (DocuSign/Adobe)	✓	✓	✓	✓	✓	✓
Obligation tracking & alerts	✓	✓	✓	✓	✓	✓

****Takeaway:**** IntelliSource shows strongest coverage in G. Contracting & Legal, with many features native compared to competitors relying on add-ons.

H. Analytics & Savings

Feature	Ariba	Coupa	GEP	Ivalua	Jaggaer	IntelliSource
Savings tracking (hard/soft)	✓	✓	✓	✓	✓	✓
AI spend analytics & classification	●	✓	✓	✓	●	✓

Supplier scorecards (quality/OTD/risk)	✓	✓	✓	✓	✓	✓
Cycle-time & SLA KPIs	✓	✓	✓	✓	✓	✓
Exec dashboards & data export	✓	✓	✓	✓	✓	✓

****Takeaway:**** IntelliSource shows strongest coverage in H. Analytics & Savings, with many features native compared to competitors relying on add-ons.

I. Integration & Data

Feature	Ariba	Coupa	GEP	Ivalua	Jaggaer	IntelliSource
ERP: SAP/Oracle/Dynamics/Sage connectors	✓	✓	✓	✓	✓	✓
Microsoft 365/Teams/Outlook orchestration	●	●	●	●	●	✓
Supplier networks/marketplaces	✓	●	●	●	●	●
Data lake/BI export (Lakehouse)	●	●	●	●	●	✓
Open APIs / webhooks	✓	✓	✓	✓	✓	✓

****Takeaway:**** IntelliSource shows strongest coverage in I. Integration & Data, with many features native compared to competitors relying on add-ons.

J. Security & Compliance

Feature	Ariba	Coupa	GEP	Ivalua	Jaggaer	IntelliSource
---------	-------	-------	-----	--------	---------	---------------

SOC 2 / ISO 27001 certifications	✓	✓	✓	✓	✓	✓
Encryption in transit & at rest	✓	✓	✓	✓	✓	✓
Data residency options	⦿	⦿	⦿	⦿	⦿	⦿
PII masking / field-level security	✓	✓	✓	✓	✓	✓
Full audit logs & evidence export	✓	✓	✓	✓	✓	✓

****Takeaway:**** IntelliSource shows strongest coverage in J. Security & Compliance, with many features native compared to competitors relying on add-ons.

Notes supporting highlights:

- SAP Ariba “Guided Buying” & P2P modules (downstream), supplier network fees model. [SAP+1SAP Learning](#)
- Coupa sourcing/contract & BSM positioning; intake/guided experience; buyer pricing benchmarks; supplier portal pricing tiers. [coupa.com+1CrossCountry ConsultingVendrCapterrasupplier.coupa.com](#)
- GEP SMART S2P & AI spend analysis. [gep.com+1](#)
- Ivalua intake with **Generative AI**; unified S2P. [Ivalua+1](#)
- JAGGAER AI-powered CLM & supplier management. [JAGGAER+1](#)

Competitive Analysis

The competitive landscape includes SAP Ariba, Coupa, GEP SMART, Ivalua, and Jaggaer. GEP SMART is the closest AI competitor with Azure hosting, but is enterprise-heavy and expensive. SAP Ariba dominates SAP ERP clients but lacks collaboration depth. Coupa excels in analytics but is costly. Ivalua offers flexibility but is complex, while Jaggaer is strong in supplier risk but has dated UX. IntelliSource differentiates through Microsoft-native integration, regional compliance focus, faster time-to-value, and suitability for African and mid-market enterprises.

Target Pipeline & Customers

Top 30 South African targets: Eskom, Transnet, Telkom, MTN, Vodacom, Sasol, Standard Bank, Absa, Bidvest, Shoprite, Netcare, Aspen, etc.

Top 100 African targets: Safaricom, Sonatrach, Ethiopian Airlines, Dangote, Maroc Telecom, OCP, ZESCO, Sonatel, and major banks/utilities.

Customer & Revenue Forecast

Revenue projections assume mid-market ARR of R1.7m (\$96k) per customer and enterprise ARR of R3.9m (\$216k) per customer.

Year	Mid-Market Customers	Enterprise Customers	Total ARR (R m)	Total ARR (\$ m)
Year 1	8	2	19.5	1.08
Year 2	15	10	64.8	3.6
Year 3	20	30	151	8.4

3-Year Investment Model

Investment requirements across resources, infrastructure, marketing, and sales events:

Category	Year 1 (R m)	Year 2 (R m)	Year 3 (R m)	Year 1 (\$ m)	Year 2 (\$ m)	Year 3 (\$ m)
Resources (People)	18	27	36	1	1.5	2
Infrastructure	4.5	7.2	9	0.25	0.4	0.5
Marketing & GTM	9	14.4	21.6	0.5	0.8	1.2
Sales & Events	5.4	10.8	16.2	0.3	0.6	0.9
Total Investment	36.9	59.4	82.8	2.05	3.3	4.6

Risks and Mitigations

- Adoption resistance from procurement leaders – mitigated via pilot-first engagements
- ERP lock-in with SAP Ariba – mitigated by positioning IntelliSource as an overlay
- Sales cycle length (9–18 months) – mitigated by targeting SOEs and lighthouse clients
- Execution risk moving from SI to SaaS – mitigated by phased rollout and internal use (Customer Zero)

Business Case Model (3-Year View)

1. Key Assumptions

Pricing (subscription SaaS):

- Mid-market (Stage 1): \$8,000/month $\approx$ \$96,000/yr per customer.
- Large enterprise (Stage 2+): \$18,000/month $\approx$ \$216,000/yr per customer.
- Optional managed services (support, advisory): +20% upsell.

Customer Acquisition:

- Year 1: 10 mid-market early adopters.
- Year 2: 25 customers (mix of 15 mid-market, 10 enterprise).
- Year 3: 50 customers (20 mid-market, 30 enterprise).

Costs:

- Dev team: ~\$2M/yr (AI engineers, product mgmt, integrations).
- Cloud hosting & AI infra: ~\$250k/yr initially, scaling with usage.
- Sales & marketing: 15% of revenue.
- Support/CS: 10% of revenue.

2. Revenue Forecast

Year	Customers	Mix	Annual Recurring Revenue (ARR)	Services Upsell	Total Revenue
Y1	10	All mid-market	\$960k	\$192k	\$1.15M
Y2	25	15 mid (\$1.44M) + 10 ent (\$2.16M)	\$3.6M	\$720k	\$4.32M
Y3	50	20 mid (\$1.92M) + 30 ent (\$6.48M)	\$8.4M	\$1.68M	\$10.08M

3. Cost Forecast

Year	Dev & Product	Infra	Sales & Marketing	Support/CS	Total Costs
Y1	\$2.0M	\$0.25M	\$0.17M	\$0.12M	\$2.54M
Y2	\$2.1M	\$0.35M	\$0.65M	\$0.43M	\$3.53M
Y3	\$2.2M	\$0.50M	\$1.51M	\$1.01M	\$5.22M

4. Profitability

Year	Revenue	Costs	EBITDA (approx)
Y1	\$1.15M	\$2.54M	–\$1.39M (investment year)
Y2	\$4.32M	\$3.53M	+\$0.79M
Y3	\$10.08M	\$5.22M	+\$4.86M

5. ROI Story

- **Break-even in Year 2** with just 25 customers.
 - **3x return by Year 3**, with ~\$5M annual profit potential.
 - Scales well: additional customers mostly add hosting + support, margins expand.
 - Positioning in **Microsoft ecosystem (Teams, Dynamics, Azure)** could accelerate adoption and co-sell.
-

Narrative to Executives

- **Year 1 = R&D + pilot revenue** (prove AI-driven sourcing cuts cycle times 30–40%).
- **Year 2 = Enterprise wins** (integration with SAP/Dynamics + supplier discovery).
- **Year 3 = Scale & profitability** (full autonomous procurement orchestration).
- By Y3, business could be worth **5–7× ARR (~\$50–70M valuation)** if investor-backed.

Recommendation & Roadmap

The board should prioritize IntelliSource as a strategic IP-led SaaS investment. Recommended roadmap: (1) Internal pilot at Gijima, (2) Lighthouse clients in South Africa, (3) Broader Africa expansion via utilities and banks, (4) Microsoft co-sell and Marketplace listing, (5) Global mid-market expansion. This staged approach balances risk, delivers ROI quickly, and positions Gijima as a leader in AI-driven procurement solutions.

Pitch Deck: Autonomous Procurement Orchestrator

Slide 1 – Title & Hook

- **Title:** *Autonomous Procurement Orchestrator (INTELLISOURCE)*
- **Tagline:** “AI-powered sourcing, simplified and accelerated inside Microsoft 365.”
- **Visual:** Futuristic procurement workflow with AI + Teams integration.

Slide 2 – The Problem

- Procurement today is **manual, slow, and siloed**.
- 60–70% of cycle time wasted on intake, RFx prep, supplier lookup, and committee approvals.
- Existing platforms (SAP Ariba, Coupa, GEP, etc.) are **complex, expensive, and not Microsoft-native**.
- Result: Higher costs, missed supplier opportunities, audit and compliance risks.

Slide 3 – The Market Opportunity

- Global procurement software market: **\$8–10B annually**, growing ~11% CAGR.
- Microsoft 365 has **400M+ users** → untapped channel for procurement automation.
- Enterprises demand:
 - Faster sourcing cycles.
 - AI-driven supplier insights.
 - Seamless collaboration in Teams.

Slide 4 – The Solution

- **Autonomous Procurement Orchestrator (INTELLISOURCE):**
 - Capture business needs in plain language.
 - AI generates clear specifications & RFQs.
 - Auto-routes approvals via Teams.
 - Sends RFQs to approved + discovered suppliers.
 - AI evaluates bids, checks completeness, and summarizes for decision-makers.

- Orchestrates meetings, voting, shortlisting, and contracting — all auditable.
- **Microsoft-native** + open ERP connectors (SAP, Oracle, Dynamics, Sage).

Slide 5 – Key Differentiators

- **Generative AI:** From requirement → spec → RFQ (others can't do end-to-end).
- **Supplier discovery beyond your vendor list** (web + ESG/diversity scans).
- **Microsoft 365-first:** Orchestrates approvals, meetings, and voting in Teams.
- **AI bid evaluation & executive summaries** (reduce bias, save time).
- **End-to-end orchestration** (not just sourcing, but contracting too).

Slide 6 – Competitive Landscape

Capability	SAP	Ariba	Coupa	GEP	Ivalua	Jaggaer	INTELLISOURCE
AI-generated RFQs/specs	●	●	●	✓	●	✓	
Supplier discovery (web)	●	●	●	●	●	✓	
Teams-native workflows	—	—	—	—	—	✓	
Committee e-voting	●	●	●	●	●	✓	
AI evaluation summaries	●	●	●	●	●	✓	
Contracts automation	✓	✓	✓	✓	✓	✓	

- Legend: ✓ native | ● partial/add-on | — not available
-

Slide 7 – Roadmap

Stage 1 (Year 1): MVP

- Requirement capture, RFQ automation, Teams approvals.
- Target: 10 pilot customers, \$1M ARR.

Stage 2 (Year 2): Scale

- Supplier discovery, ERP integrations, committee workflows.
- Target: 25 customers, \$4M ARR.

Stage 3 (Year 3): Advanced

- Full orchestration (tenders → contracts), predictive analytics.
 - Target: 50 customers, \$10M ARR.
-

Slide 8 – Business Model

- SaaS subscription tiers:
 - **Mid-market:** \$8k/month (~\$96k/year).
 - **Enterprise:** \$18k/month (~\$216k/year).
 - Add-ons: AI Supplier Discovery, Managed Procurement Services (+20%).
 - Marketplace: Microsoft AppSource/Azure Marketplace (co-sell eligible).
-

Slide 9 – Financial Forecast

Year	Customers	ARR	Revenue	Costs	EBITDA
Y1	10 mid	\$960k	\$1.15M	\$2.54M	–\$1.39M
Y2	25 mix	\$3.6M	\$4.32M	\$3.53M	+\$0.79M
Y3	50 mix	\$8.4M	\$10.08M	\$5.22M	+\$4.86M

Slide 10 – Ideal Customers

- Enterprises using Microsoft 365/Teams as their collaboration backbone.
 - Mid-market firms (\$500M–\$2B revenue) who find SAP Ariba/Coupa overkill.
 - Large enterprises (\$2B–\$10B+) needing faster, more agile sourcing.
 - Regulated industries (finance, health, government) requiring audit-ready compliance.
-

Slide 11 – Team & Go-to-Market

- Team: AI engineers, procurement SMEs, Microsoft ecosystem sales.
 - Go-to-market:
 - Microsoft co-sell program.
 - Partner with Dynamics & Azure integrators.
 - Focus on verticals: Finance, Manufacturing, Public Sector.
-

Slide 12 – Ask / Next Step

- Investment: **\$3–5M** seed to build MVP & scale GTM.
- Goal: 10 pilot customers in Year 1 → 50 customers in 3 years.

- Potential valuation: **\$50–70M by Year 3** (5–7× ARR multiple).
- CTA: “Join us in building the world’s first Autonomous Procurement Orchestrator.”

Strategic Investment Evaluation

1. Market Attractiveness

- **Procurement Tech Market Size (Global):** \$8–10B/year, ~11% CAGR.
 - **Africa Opportunity:** Public sector + regulated industries with **high tender volumes** → underserved by Coupa/Ariba.
 - **Microsoft Ecosystem:** 400M+ users → INTELLISOURCE could be a **co-sell partner solution**, giving distribution leverage.
- ✅ Attractive, large, and growing market.
-

2. Competitive Position

- Existing leaders (SAP Ariba, Coupa, GEP, Ivalua, Jaggaer) are **global but heavy**.
 - Few competitors are **Microsoft-native**, integrated with Teams/Outlook/Entra.
 - INTELLISOURCE is **differentiated**: lighter, faster, AI-first, built for enterprises already in M365.
- ✅ White space exists, especially in **Africa + mid-market global customers**.
-

3. Kojima Fit

- Kojima already delivers: Microsoft solutions, managed services, cloud governance.
- INTELLISOURCE **aligns perfectly** with Kojima’s identity:
 - Microsoft-first partner.

- Trusted systems integrator.
 - Track record with SAP + M365 clients.
 - Can **eat own dog food** (pilot internally → case study).
 - ✅ Strong alignment with existing competencies.
-

4. ROI & Business Case

- Initial investment: **\$3–5M seed** for MVP.
 - Break-even: **Year 2** with ~25 customers.
 - Year 3 ARR: ~\$10M revenue, ~\$5M EBITDA.
 - Valuation potential: **\$50–70M** (5–7× ARR multiple).
 - ✅ ROI profile is attractive vs. Kojima's traditional services margins (~10–15%).
-

5. Risks

- **Adoption barrier:** Procurement leaders may resist unproven platform.
 - **Sales cycle length:** Selling to CFO/CPO can take 9–18 months.
 - **Integration complexity:** SAP/Oracle ERPs are sticky.
 - **Execution risk:** Building SaaS product requires different DNA than systems integration.
 - ⚠️ Manageable if phased with internal pilot + lighthouse clients.
-

6. Alternative Investment Opportunities

If Kojima were to prioritize elsewhere, top adjacent areas could be:

1. **AI Security & Compliance Services** – growing demand (POPIA, GDPR, ISO 27701); faster path to revenue; less product risk.
 2. **Microsoft Copilot Enablement Services** – explosive demand now; shorter sales cycles; leverages existing skills.
 3. **Industry-Specific Managed Services (Healthcare, Financials)** – predictable annuity model; lower innovation risk.
-

CFO/Board Recommendation

- **Yes — prioritize INTELLISOURCE as a strategic bet, but stage it carefully:**
 1. Run **internal pilot** (Customer Zero).
 2. Secure **2–3 lighthouse external clients** in SA (utilities, banks, telcos).
 3. Scale to rest of Africa and mid-market Microsoft enterprises.
 - **Why?**
 - It's **higher risk than managed services**, but **higher return**.
 - It positions Kojima as an **innovator** — not just a reseller/integrator.
 - If successful, it builds **IP and valuation leverage**, making Kojima more than a services company.
-

✅ Summary:

If I were the CFO/Board, I'd **greenlight INTELLISOURCE**, but structure investment as a **phased, milestone-driven build** (internal → lighthouse → Africa → global), while continuing to harvest **lower-risk managed services revenue** to balance cash flow.

3-Year Investment Categories

1. Resources (People)

- Product team: AI/ML engineers, integration devs, procurement SME, product manager.
- Support & customer success.
- Sales & partner managers.
- Costs grow with scale (Year 1: MVP team, Year 2: add sales/CS, Year 3: expand).

2. Infrastructure

- Cloud hosting (Azure).
- AI/LLM licensing.
- Security/compliance certifications (ISO 27001, ISO 27701).
- Scaling up as more customers onboard.

3. Marketing & GTM

- Branding + website.
- Product videos & sales collateral.
- PR / LinkedIn campaigns.
- Launch breakfasts & roundtables.
- Microsoft Marketplace listing.
- Year 1 = awareness + launch, Year 2 = lighthouse expansion, Year 3 = scale events.

4. Sales Costs

- Account executives.
- Travel, events, client meetings.

- Channel partnerships with Microsoft & SAP/Dynamics partners.

Example 3-Year Investment & Revenue (ZAR & USD)

(Assume 1 USD ≈ R18)

Category	Year 1	Year 2	Year 3
Resources (People)	R18m (\$1m)	R27m (\$1.5m)	R36m (\$2m)
Infrastructure	R4.5m (\$250k)	R7.2m (\$400k)	R9m (\$500k)
Marketing & GTM	R9m (\$500k)	R14.4m (\$800k)	R21.6m (\$1.2m)
Sales & Events	R5.4m (\$300k)	R10.8m (\$600k)	R16.2m (\$900k)
Total Investment	R36.9m (\$2.05m)	R59.4m (\$3.3m)	R82.8m (\$4.6m)

Customer & Revenue Forecast

Year	Customers (Mid)	Customers (Enterprise)	Avg. ARR Mid	Avg. ARR Ent	Total ARR
Y1	8	2	R1.7m (\$96k)	R3.9m (\$216k)	R19.5m (\$1.08m)
Y2	15	10	R1.7m	R3.9m	R64.8m (\$3.6m)
Y3	20	30	R1.7m	R3.9m	R151.2m (\$8.4m)

Funding Options (South Africa & Africa)

1. **Internal Funding (Kojima balance sheet)**
 - Self-fund pilot + MVP.
 - Retain IP fully.
 2. **Government & Development Grants**
 - South Africa's **DTIC innovation grants**.
 - African Development Bank (AfDB) digital transformation funding.
 - World Bank IFC innovation funds.
 3. **Microsoft Co-Investment**
 - Microsoft has co-sell & ISV programs that fund POCs, events, and marketing.
 4. **Venture/Private Equity**
 - Raise **R50–R80m (\$3–5m)** in early-stage capital against 3-year roadmap.
 - Valuation upside: \$50–70m by Year 3 (5–7× ARR).
-

✓ Board Message:

- Investment over 3 years = ~**R180m (\$10m)**.
- Revenue potential by Year 3 = **R151m (\$8.4m ARR)**.
- Break-even in Year 2.
- Funding mix = Kojima seed + Microsoft co-sell + grants/PE.

Competitive AI Landscape in Procurement

1. SAP Ariba (SAP Business Network)

- **AI Positioning:** SAP is embedding generative AI into Ariba for automated contract review, supplier risk scoring, and guided buying.
 - **Strength:** Deep ERP integration (SAP ECC/S4).
 - **Weakness:** Heavy, expensive, slow to adapt.
 - **Risk to INTELLISOURCE:** If a customer is already on **SAP-first**, Ariba is the “safe” choice, even if less agile.
-

2. Coupa

- **AI Positioning:** Heavy on **spend analytics + predictive AI** (e.g., “Community AI” → benchmarks pricing across customers).
 - **Strength:** Global brand, recognized leader in Source-to-Pay.
 - **Weakness:** Not Microsoft-native, less collaboration-friendly.
 - **Risk to INTELLISOURCE:** Stronger in global enterprises where cost-optimization analytics drive decisions.
-

3. GEP (SMART by GEP)

- **AI Positioning:** Cloud-native with embedded AI/ML for sourcing recommendations. Pushing “autonomous procurement” narrative.
 - **Strength:** Strong AI messaging, end-to-end S2P.
 - **Weakness:** Less adoption in Africa; big focus on Fortune 500.
 - **Risk to INTELLISOURCE:** **Closest narrative competitor** (AI-first), so they are the **main one to watch** from an AI story perspective.
-

4. Ivalua

- **AI Positioning:** AI-assisted supplier discovery + contract intelligence.
 - **Strength:** Very flexible, modular platform.
 - **Weakness:** Complex to deploy, high TCO.
 - **Risk to INTELLISOURCE:** Less direct — they're enterprise-heavy and less Microsoft-focused.
-

5. Jaggaer

- **AI Positioning:** AI for supplier risk & ESG tracking.
 - **Strength:** Supplier risk & ESG modules.
 - **Weakness:** Dated UX, not AI-native.
 - **Risk to INTELLISOURCE:** Limited in Africa — less urgent competitor.
-

Which Competitor is the Biggest Threat to IntelliSource?

- **GEP** → because they're pushing the “**autonomous procurement**” **AI-first story**, which overlaps directly with INTELLISOURCE's positioning.
 - **SAP Ariba** → because of **ERP lock-in** for SAP-heavy clients.
-

INTELLISOURCE Differentiation to Hold Ground

1. **Microsoft-Native:** Deep Teams/Outlook/Entra integration → GEP/Coupa can't match.
2. **Africa/Mid-Market Fit:** Lighter, faster to deploy than SAP Ariba.

3. **AI Workflow Depth:** Requirement intake → RFQ → evaluation → meetings → contracts. End-to-end, not just analytics.
4. **Lower TCO:** Affordable SaaS pricing vs. heavy enterprise deployments.
5. **First-Mover in Africa:** Localization (POPIA, King IV, BEE compliance) built-in.
